INTRODUCING THE

# GLADIATOR FORCE

Made in Australia, the Gladiator Force is **rugged, compact** and built for comfortable off-grid adventures

The Gladiator Force was designed for those who crave adrenaline, live for adventure and seek out the trails less travelled. They capture the views few people are lucky to see. They appreciate true quality. And they expect their overlanding travel trailer to keep up with them without compromise when exploring all that nature has to offer.

It's a tough little unit with everything you need for overlanding excursions. Providing independent coil suspension and a galvanized Australian dual stacked steel six-inch chassis. The Gladiator Force packs serious punch for its size and make no mistake; it will get you where you want to go!

Boondocking is more enjoyable than ever as the Gladiator Force is equipped with standard features usually reserved for larger RVs. Including a cassette toilet, wet bath, beautiful interiors, smart TV, versatile bed configuration, 400AH heated lithium battery, 3kw inverter, 2 X 200W solar panels and a DC/DC battery management system. Dual heated freshwater tanks, portable induction cooking (perfect for camping at high altitude), external work lights and a grey water tank will ensure your stays off-grid have you focusing on the experience rather than worrying about the amenities. Enjoy your journey with the Gladiator Force, where Australian craftsmanship and quality meet your travel aspirations.

- 110V/12V wiring
- Anderson plug to battery for portable solar charging and jump start
- 3000W inverter with shunt

## DISCLAIMER:

\*Indicative lengths and weights are for standard configuration, weights are approximate only and can vary between individual RVs. The Compliance Plate specifies the accurate weight for each respective travel trailer. Body length is measured externally from the front wall to the back wall. Overall length is measured externally from the A-frame coupling to the back wall and excludes the removable rear bumper bar and spare wheel (approx. 16 inches). Overall width is measured externally and includes all protruding fixtures. All specifications are correct at time of print and are subject to change without notice due to ongoing improvements

\*The 3D floorplans on this flyer feature partial cross-sections of the travel trailer for visual representation only. For a detailed view of the layout, please visit our website.
