INTRODUCING THE

CHAMELEON

Introducing the Chameleon Liberty SV: Tough and charismatic, all the way from Australia!

Built to last, the Chameleon Liberty SV is a compact travel trailer that features high-end insulated fiberglass-based panels, making this RV strong, lightweight and eliminates the worry of wood rot. And don't forget, an insulation rating, far superior to that of meranti or stick and tin travel trailers, keeping you cooler under the desert sun and warmer at the alpine elevations!

Compact in stature but surprisingly spacious inside, the Chameleon is fed by the sun with dual solar panels powering the heated lithium battery. Providing fresh water and hot showers with the safety, security and convenience of an internal toilet and wet bath, you can be comfortable no matter where the road takes you.

The Dreamhaven RV Chameleon is perfect for the traveler that wants the freedom to experience Mother Nature when not connected to the amenities of an RV or national park campground. Taking in the uninterrupted views of the stars and the sounds of serenity will provide the moments, memories and adventures you've been craving. Experience the superior Australian craftsmanship and innovation with the Chameleon Liberty SV, where quality meets your travel aspirations.

Over 20 years of experience in travel trailers with superior build quality

Able to Withstand Extreme Temperatures

Award-winning Australian camper trailer manufacturer

Outstanding Customer Reviews

FLEXIBLE BEDDING:

The Chameleon Liberty SV provides you options for your camping arrangements whether it's a girl's weekend away or an anniversary escape. The versatile sleeping area offers two single beds that can form a queen bed on the spot and dual, large double paned windows bring the beauty of the outdoors in.

- Anderson plug to battery for portable solar charging and jump start

DISCLAIMER:

*Indicative lengths and weights are for standard configuration, weights are approximate only and can vary between individual RVs. The Compliance Plate specifies the accurate weight for each respective travel trailer. Body length is measured externally from the front wall to the back wall. Overall length is measured externally from the A-frame coupling to the back wall and excludes the removable rear bumper bar and spare wheel (approx. 16 inches). Overall width is measured externally and includes all protruding fixtures. All specifications are correct at time of print and are subject to change without notice due to ongoing improvements

*The 3D floorplans on this flyer feature partial cross-sections of the travel trailer for visual representation only. For a detailed view of the layout, please visit our website.
