Softens ride and improves handling

MICHELIN® XZE TIRES

Commercial-grade tires built for long hauls and heavy loads

RIDE & HANDLING. DEFINED.

At Jayco, we believe the journey is just as important as the destination, which is why we engineered an industry-first Ride and Handling package - Jayco exclusive JRide®. Packed with ride-enhancing upgrades, get ready for a drive that'll move you.

THE JAYCO DIFFERENCE

2+3
YEAR WARRANTY

[Click here to learn more!](#)

1 Jayco 2+3 Warranty

A quality warranty represents huge value. Of course it saves you money in case there's a manufacturer defect, but it also represents a lot more. The longer and more complete the warranty a manufacturer offers, the more confidence they have in their work - the higher quality product and more value you'll be taking home.

Jayco's warranty is the best in the RV business. The two-year limited warranty is twice as long as the industry standard, keeping you covered for two full camping seasons. Add to that the three-year limited structural warranty and you've got the most complete coverage, coverage that provides a peace of mind.

[Click here to learn more!](#)

2 STRONGHOLD VBL™ laminated walls

Jayco's exclusive STRONGHOLD VBL (vacuum-bond lamination) wall construction process uses vacuum bonding to combine laminated fiberglass with welded aluminum framing, metal backers, decorative interior wall panels, and fiberglass exterior siding. This super-durable structure is designed specifically for heavy use and travel while still reducing weight. Simply put, Jayco's Stronghold VBL construction lessens the chance of delamination and stands up to the elements longer.

3 The JRide® ride and handling package

In a motorhome, the adventure does not begin and end at the campsite; the ride to and from camp is an important part of the journey, which is why comfort is a top priority at Jayco. Improving the journey is what inspired our exclusive JRide packages, which offer a powerful blend of precise handling and renowned stability. These important additions make your trip more comfortable without the need for expensive aftermarket upgrades.

4 Safety belts in every designated seating location

Everyone would agree the most precious cargo is the loved ones you travel with. Jayco installs stress-tested seatbelts in every designated seating location to ensure the safety of your entire family. In a Jayco motorhome, you won't have to put anyone at risk due to limited safety belts.

7 Third brake light and backup cameras

Backing up a motorhome is unlike backing up your everyday vehicle. It can be expensive, tricky and even impossible to retrofit some motorhomes with additional safety signals or rearview cameras. At Jayco, backup cameras and third brake lights are installed on each and every motorhome. These features allow you to navigate with ease, while helping deliver you to your camping destination safely.

10 Strong Roof

Not only is a strong roof important because it's key to the overall structural integrity of a unit, but also for maintenance purposes. The roof may need some TLC throughout the camping season. The ability to safely walk on the roof to perform some simple cleaning and sealant maintenance, is a huge perk for Jayco owners. Not to mention how it can endure a surprisingly heavy snowfall or falling tree limb.

750-lbs.

Jayco's Overhead Bunk Capacity

300-lbs.

Jayco's Standard Bunk Capacity

5 Unbeatable bunk ratings

Overhead bunks are a great way to add extra sleeping space without impacting the layout of a motorhome. Unfortunately, customers in competing coaches often have to be very careful about who sleeps in the overhead bunk, or what gear is stored there, due to weight limits of 350-500 lbs.

Jayco has designed our overhead bunks to hold 750 lbs.- this is 250 lbs. more than any of our competitors. In a Jayco overhead bunk, two adults can comfortably rest and relax, or you can safely read a book to your kids at night.

Jayco's superior bunk capacities extend beyond the overhead bunks, with a capacity of 300 lbs. in each standard bunk, as well.

8 Solar hookups, LED lighting

It's not only environmentally friendly, but solar hookups reduce the cost and load of electrical use in your RV at camp. More and more motorhomes are equipped with solar hookups or prepped for easy installation. LED lights are another energy saving option many RVs offer. Both solar prep and LED lights will be found on all Jayco motorhomes.

6 120" Windshield

An uninhibited view of the open road is a perk of a Class A motorhome. At Jayco, the largest windshield in the industry provides improved visibility during travel. Oversized wiper blades keep the view clear, even in the rain.

9 Resale Value

Most RV owners will upgrade their rig at some point in their camping lifetime. The list of hidden value items discussed above improves the longevity of a Jayco, which increases resale value. Also, when establishing a trade-in value, motorhomes are valued by their base price only. Any optional equipment will not be included in this number. Jayco motorhomes come packed full of standard features, with very few items left to option in. By building desired options into the base price of the coach as standard features, rather than adding them as options, Jayco builds a higher resale value into their motorhomes. This leads to a better return on your hard-earned investment.

WE GO TO GREAT LENGTHS TO BUILD BETTER RVs

You can count on our motorhomes - and our focus on family fun - to go the distance. So you can maximize every moment, no matter where the journey takes you. These are the extra steps we take to set our RVs apart.

WHY YOUR LOCAL DEALER IS YOUR GREATEST ASSET

Before purchasing an RV of your own, you need to explore, touch and test drive one for yourself. From the sales experience to service after the sale, we consider our dealers to be an important part of the Jayco family. Establishing a strong relationship with your local Jayco dealer is a key factor in the enjoyment of your new unit for more than just the buying stage.

Research: The initial research that goes into choosing an RV can be overwhelming and with so many different options, how will you narrow it down? Having a local dealer who is knowledgeable and can answer all of the questions you will inevitably have as well as make helpful suggestions will make the buying experience a positive one. From towing weights and cargo capacity to living space and in-unit technology, your Jayco dealer will have all the information you need to make an informed decision and pick out the unit that fits your wants and needs.

Sale: Once you have decided which RV is right for you, signing the papers and picking up your new Jayco comes next; a huge step that should be an exciting and smooth process for you. The last thing you want when you're making this kind of commitment is to feel that you're being taken for a ride. It's comforting having someone behind you that ensures your needs are being met as the sale progresses. The luxury of your dealer walking you through each step will give you the peace of mind that all of your bases will be covered.

Post-Sale: After the sale, maintaining a strong relationship with your local dealer has tons of benefits that will come in handy. Most dealers offer after-sale service on your coach that will make it easier to get fixes or upgrades so you can spend less time waiting and more time exploring. Having them just a short drive from you is just an added bonus that will make your experience so convenient and enjoyable.

Whatever stage of RV ownership you find yourself in, your local Jayco dealer is your greatest advantage. Creating a lasting relationship with them will benefit you and your RVing experience for years to come. So go ahead, locate your nearest dealer and see what they can do for you!
