B VANS

NO WOOD INTERIOR

QUALITY AND VALUE
With over 30 years of experience building commercial vehicles and satisfied customers nationwide, you can count on Embassy.

POWERFUL HVAC
Innovative 12V air conditioner and hydronic heat system heats your air and water more efficiently than electric or LP systems.

MODELS AND FLOORPLANS
Choose from luxury level models including the Dolphin S, SS and SL. See website for more info.

ZERO WOOD
In our RV interior construction!

EASY TO SERVICE
Easy access to major systems means less time and trouble when servicing.

BUILT TO LAST
We take the time to carefully craft each Embassy Class B RV to make sure it's right before it goes out the door.

OPEN CONCEPT

By taking time to completely re-think the main cabin area, this open and spacious design provides lots of room to spread out and enjoy your Embassy Class B lifestyle.

BETTER MATERIALS

Embassy RV was the first manufacturer to introduce ZERO WOOD. Wood RV structural components just don't stand up to years of use and abuse. Embassy leads the way in innovation!

MORE COMFORT

We use eight layers of specialized aircraft insulation for a quiet, efficient interior space. This also allows all of our other systems and components to work in an ultra-efficient unit.

BIG BATHROOM

You can switch from changing area with a table and lighted vanity mirror to a fully-functional bathroom in seconds. Our unique design is well thought out for your convenience.
