The Aluminum Advantage

1

Built to tow: Aluminum is lightweight and extremely durable, making it an ideal structure to tow.

2

Built to trust: Unlike a wood frame, our aluminum cage is designed to support a fiberglass outer structure making it rust, water and even dent resistant.

3

Built to last: By crafting one solid structure formed from fully welded aluminum, we are providing the strongest foundation using the longest-lasting materials on the market.

1

Built for more: Our “Tilt-Forward Design” expands the interior living space without adding length to the trailer’s frame.

2

Built for style: Bringing more dimension and elegance to the exterior frame, the tilt offers a sleek and fresh perspective to the classic travel trailer design.

3

Built for you: Enjoy every meal with the ultimate view from our panoramic windshield that gives you a front row seat to nature’s beauty.
